Car Giant sell [cheap used BMW](#) and advertise giant cars without the giant prices. I would recommend this car supermarket if you do not have a clear idea of which make and model you should buy. This is because you can browse around all of their second hand cars at your leisure and test drive various vehicles. For those of you that know you want a used BMW and nothing else will suffice, then Big Motoring World should be your first port of call. They have over 500 cars on display at their car showroom and specialise in this prestige brand.
